

**[ MINIVAP. THE ONE IN THE WORLD. ]**  
a jewel of technology.

**PEGORARO**  
GAS INNOVATIVE TECHNOLOGIES

## MINIVAP. technical details.

### MINIVAP

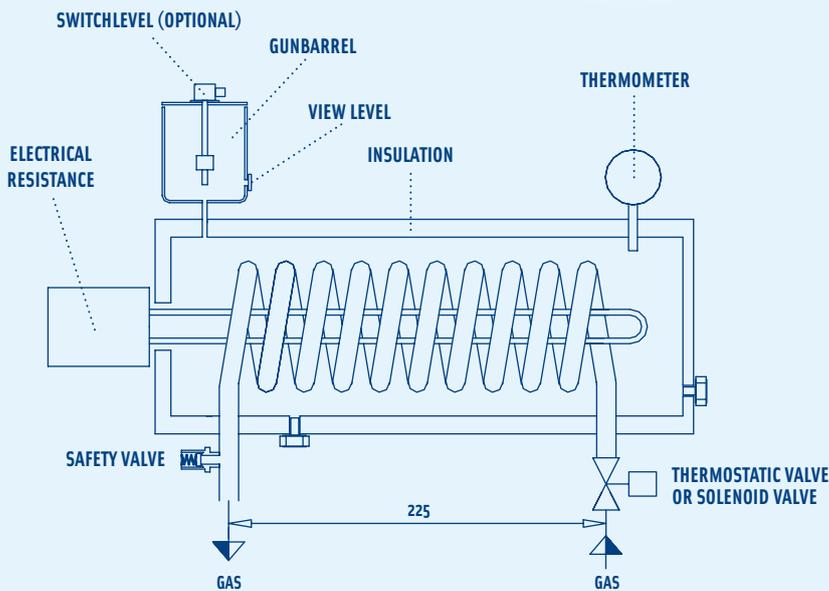

Horizontal execution and without level's regulation.

#### MINIVAP 15:

With solenoid valve that commands liquid gas flow according to the water temperature.

#### MINIVAP 30:

With Regulation Thermostatic Valve (our international Patent) that controls liquid gas flow according to the water temperature.

#### VERSIONS

MINIVAP 15 with water preheat by electrical resistance and capacity until 15Kg/h

MINIVAP 30 with water preheat by electrical resistance and capacity until 30Kg/h

MINIVAP 40 with water preheat from boiler and capacity until 40Kg/h

**Optionals:** Additional emergency added or joint to the Regulation Thermostatic Valve, that controls liquid gas flow according to the gas temperature in escape from the vaporizer. Switchboard.

## OTHER VAPORIZERS

### VAPEG

Horizontal execution with tube bundle and without level's regulation. ASME and VSR (PED) directives.

With Regulation Thermostatic Valve (our international Patent) that controls liquid gas flow according to the water temperature in

escape. This solution prevents not vaporized from overflowing.

**Size:** from 200 Kg/h to 2000 Kg/h.

#### Execution:

- with water preheat from boiler.
- hot water vaporizers with electric preheat in execution EEx-d.

**Optionals:** Additional emergency added or joint to the Regulation Thermostatic Valve, that controls liquid gas flow according to the gas temperature in escape from the vaporizer. Possibility of working in feedback.

### ECOVAP

Vertical execution and without level's regulation. ASME and VSR (PED) directives. With Regulation Thermostatic Valve (our international Patent) that controls liquid gas flow according to the water temperature in escape.

This solution prevents not vaporized from overflowing.

**Size:** from 50 Kg/h to 100 Kg/h with water preheat by Electrical Resistance in execution EEx-d.

**Size:** from 50 Kg/h to 200 Kg/h with water preheat from boiler.

**Optional:** Additional emergency added or joint to the Regulation Thermostatic Valve, that controls liquid gas flow according to the gas temperature in escape from the vaporizer. Switchboard.

## PEGORARO PRODUCTS AND SERVICES

High technology gas equipment and systems. Quality service, in Italy and abroad. International patent on LPG Regulation's Thermostatic Valve.

REDUCING AND METERING STATIONS - METAL CABINETS - PRESSURE REGULATORS AND STABILIZERS - VALVES AND SOLENOID VALVES - CARTRIDGE FILTERS - ACCESSORIES  
RECONDITIONING SERVICES FOR EQUIPMENT OF THE BEST BRANDS - SPARE PARTS - LPG REFUELLING UNIT FOR VEHICLES (SKID)

UNI EN ISO 9001:2000 (Quality System certified since 1997)

**Certification according to the 97/23/CE PED directive for:** Gas pressure reducing units  
Cartridge filters - Gas heat exchangers - LPG vaporizers - LPG refuelling units for vehicles
